

FAN TOOL

USER GUIDE

GET TO KNOW YOUR GEAR

USB Fan Tool is a lightweight and quiet way to cool off.

1. Attach the soft fan blades to the motor by sliding the two pieces together.
2. Plug the assembled fan tool into Goal Zero Switch 10's USB output.
3. Keeping one hand on the fan, slide the metal collar of the Goal Zero Switch 10 up one click, and twist the collar in the direction indicated by the "tighten" arrow until snug.
4. Turn on/off by pressing the green button.

FREQUENTLY ASKED QUESTIONS

Can the Fan Tool be used with any USB port?

Yes! Although designed to be used with the Goal Zero Switch 10 Recharger, the Fan Tool can be used with any live USB port; i.e. another Goal Zero product (like the Lighthouse lanterns) or from a computer.

My fan isn't turning on after I press the button. What gives?

Try pushing the button again. The Fan Tool doesn't have a big power draw and in some instances, pressing the button the first time won't activate the USB port.

TECHNICAL SPECIFICATIONS

Fan Tool

Fan (output) 5V, 0.35A (1.7W max)

Runtime on Goal Zero Switch 10 5 hrs

General

Weight 1.3 oz (36 g)
